

Quidgest _ ^ **ACADEMY**

IT FUTURE JOBS

WHAT IF

...It was possible to create the software code for a solution, based solely on the data, interfaces, processes and business **model** definitions

...the creation of this code was fully (95%-100%) **automatic**

...the code could be created for whatever **standard technology** the customer needs

...it was deployed in an open source environment

...you could learn **how** to do it at a fast speed

BIG CHALLENGES

Companies need software development

As our global economy increasingly comes to run on technology-enabled rails and every company becomes a tech company, demand for high-quality software is at an all-time high.

In some studies it is currently ranked as a priority above capital constraints.

“Software developers are now more valuable to companies than money”

Will Gaybrick, Stripe CFO, September 2018

- In our academy we have programs to help companies developing their own software **without the need to rely on software coding experts**

BIG CHALLENGES

Lack of digital skills in the market

There is lack of resources in software engineering worldwide. The market is demanding an amount of programmers that is not currently available.

Ideas are being lost because the lack of resources.

The European Commission has predicted a **shortfall of 900,000 adequately skilled programmers** and other technology professionals in Europe by 2020.

- In our academy we teach software development not only to engineers, but to everyone, and 10 times faster.

BIG CHALLENGES

Learning how to code takes time

Time needed to Practice: you can't learn a new programming language without dedicating a significant amount of time to it; it takes around 6 years become fluent at coding;

Choosing a programming language: it is increasingly hard to figure out what are the best tools to use for your company. There are hundreds of programming languages out there, and all of them come with advantages and disadvantages. Choosing the right language to learn can be an agonizingly hard decision.

Avoiding errors and Bugs: Compiler errors are notoriously cryptic, verbose and frequent. And a lot more for someone who is learning.

Code quality: Knowing how to code is one thing, but knowing how to code in a way that's efficient and makes it easy to modify in the future is a complete different world.

 In our academy we teach software development without errors and without needing to code.

BIG CHALLENGES

People without opportunities because of skills mismatch

Youth unemployment in the eurozone has been stuck between 19% to 25% for the past eight years. In Spain and Greece, it's north of 40%.

The educated unemployment is over 10%, going over 15% in some country's.

We have skilled people being underutilized.

“The skills mismatch is a global issue affecting not only individuals but economies”

Professor Seamus McGuinness of The Economic and Social Research Institute (ESRI)

- In our academy we teach how to create solutions in your area of knowledge. We teach how to become a full stack developer without coding.

CHALLENGE ACCEPTED

In our academy we teach how to create software and build **all sorts of solutions:**

WITHOUT NEEDING TO CODE

Build your idea, not your code

WITHOUT ERRORS

Generating millions of lines of code without errors

TO EVERYONE

Sign up without limitation of age or skillset

IN YOUR AREA OF KNOWLEDGE

Create software in your area of expertise

OUR **UNIQUE** MISSION

Quidgest is a global company with 30 years of experience developing software almost without coding.

Its creators believe in a world where everyone embraces technology as an essential tool of their lives.

Where creating solutions is a something for everyone, everywhere.

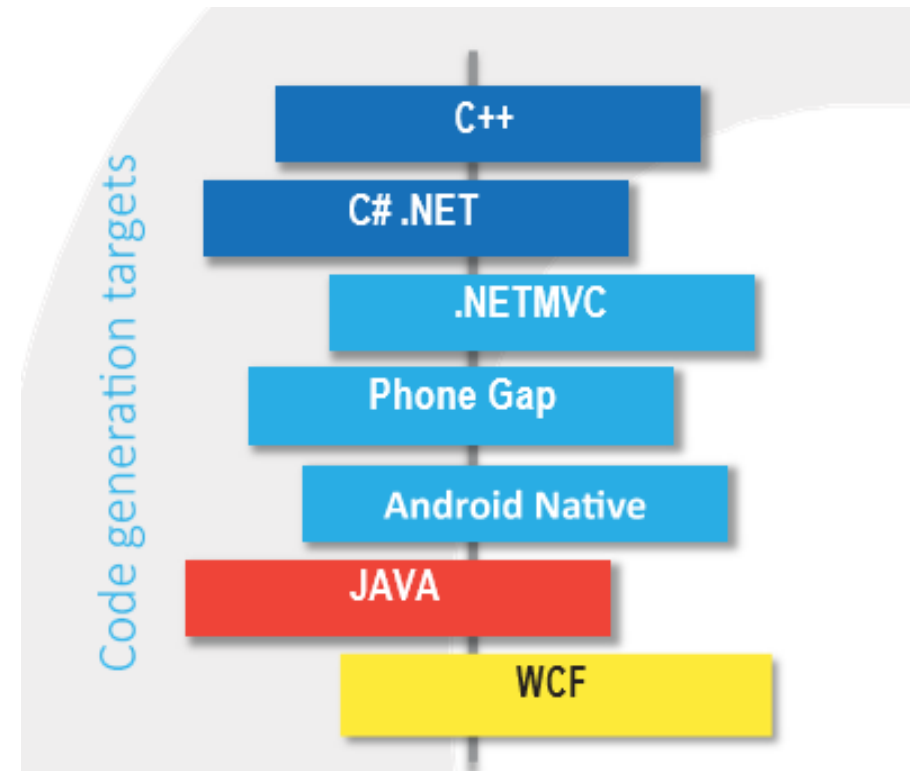

Making it a reality became our unique mission.

HOW WE DO IT - *Genio*

In Quidgest, we use GENIO platform for rapid and agile development of software, combining model-based development with automatic code generation in a variety of programming languages and technologies.

Much more than just programming, GENIO generates code in standard programming languages (Java, C# and C++) and works with leading relational database management systems (SQL Server, Oracle).

HOW WE DO IT - *Genio*

GENIO fulfils the dream of all programmers: make software that works on the first try. It is possible to create the definition of a program, ask GENIO to build it and start it right away.

It is a platform that accelerates the production of code, delivering it in an open source output. The solution deployed is completely independent from GENIO.

All these aspects enable any trainee, despite his/her knowledge and background, to use the platform and its patterns in a very user-friendly way. It uses the same process as if someone was using Lego pieces.

HOW YOU WILL DO IT

Using our unique GENIO platform, you will be able to use an innovative approach towards the Development of Digital Skills and Software, in which different profiles of entrepreneurs can put their ideas into practice. No matter your age and or area of study, you will be able to access a fast and efficient learning process that can level up professional careers and business opportunities anywhere.

Quidgest founded the Quidgest Academy and implemented several innovative training programs where education and technology are perfectly combined:

The image shows three program cards arranged horizontally. Each card has a background image and a white text box. The first card is purple, the second is teal, and the third is blue.

- G_KNOWLEDGE TRAINING**
 Become a *Full Stack Developer*
- GEN_GENERATION INCUBATOR**
 Leverage the best *startup business*
- GENIO_4ALL BOOTCAMP**
 Challenge, *Software* and Social Responsibility

G_KNOWLEDGE

TRAINING

Become a full stack developer

Value proposal

- Software creating classes with specialized trainers
- 3 months free **GENIO** license
- Standard Technical support for three months

COURSES

	Beginner		40h
	Advanced		40h
	Architect		20h
	AddOns		20h

PROFESSIONALS

Those looking for a professional career change and improve their Digital Skills.

GEN_GENERATION

INCUBATOR

Boost your business

Value proposal

- Software creating classes with specialized trainers
- Business consulting in your specific area
- 6 months free **GENIO** license
- Personalized Technical support for six months

OVERVIEW

- 🕒 1 week training
- 🏈 1 month coaching
- 🔧 6 months support

STARTUPS AND SMEs

Unlimit ambitions and goals by developing the software that can enhance competitive advantage.

Quidgest ACADEMY
GENIO_4ALL
BOOTCAMP
Solutions for everyone

Value proposal

- Software creating classes with specialized trainers
- Travel with your team to a community to identify the real problems
- Specialized coaches to guide the team
- Create a solution for the community problems

OVERVIEW

-  1 week training
-  1-2 coaches
-  Problem solving
-  Helping others

YOUNG STUDENTS AND GRADUATES

From different academic backgrounds who wish to leverage their careers, develop their skills and imagining their future in the professional world.
